Why This Book Matters:

Silent Spring explains the dangers of pesticides in relation to human health and how we can take responsibility for the earth's well-being by choosing alternative methods.

The Big Takeaways:

1. **The production of insecticides went up following World War II.**
 1. If DDT, a pesticide, is widely used following WWII, but in killing pests, it may also be killing us.
2. **Pesticides hurt nature.**
 1. Pesticides hurt every part of nature, including the soil, the water, and the animals.
3. **The impact pesticides have on nature eventually affect humans.**
 1. Pesticides move through the food chain, eventually

resulting in human consumption.

4. Pesticides throw off the stability provided by the earth.

1. Everything in the universe has a natural ebb and flow, but humanmade chemicals can throw that off quickly.

5. It is our responsibility to find healthy alternatives to pesticides.

1. There are many naturally-occurring alternatives to pesticides that we can use while not hurting the earth.
